

# SCREW ON PIPE CLAMP

Type 109 Gu

one piece, with link-in screw top and elastomer inlay

SOUND INSULATED  
according to  
DIN 4109

All dimensions in mm

## Assembly sequence

1. 
2. 
3. 

### Description

The zinc-coated screw on pipe clamp Type 109 Gu is a one piece clamp, equipped with a great load-bearing capability and a riveted M8 connection nut, for the assembling of plastic- or folded-seam pipes from 50 to 315 mm in every fitting position. The easy to install pipe clamp disposes of a closed limb **link-in screw top** and is suitable for flexible pipes with large diameter. The pre-assembled screw is easily screwed in with battery-operated screwdrivers. There are no unfortified parts, the pipe clamp is delivered ready to mount. No part must be disassembled. **Link-in, screw tightly, ready !**

### Combination possible with Type

102 a M8, 104, 307 HZ

### Specification

Zinc-coated

### Preferable fields of application

Climate-, air- and sanitary technology
